**Advazorb®**

Hydrophilic foam dressing with film backing

**Product description**

Advazorb® and Advazorb® Lite are soft and conformable, low-adherent, hydrophilic, polyurethane foam dressings with a breathable film backing.

A non-adherent foam dressing with excellent fluid handling properties, ideally for wounds with low to medium levels of exudate. Ideal for use under compression bandaging with it’s fluid retention, low profile and low friction film backing.

The Advazorb® range features a waterproof film backing that prevents strike-through. The backing has been designed to reduce friction on clothes and bandages which extends dressing wear time by reducing ‘rucking’ and preventing dressings falling off.

With an high MVTR the Advazorb® foam range provides the ideal conditions for wound healing.

**Use**

Apply directly to the wound surface pink film side up and secure in place with tape, appropriate bandage or secondary dressing.

**Contra-indications**

Arterial bleeds, heavily bleeding wounds and vascular fungating tumours.

**Storage**

Store at room temperature, out of direct sunlight and keep dry.

**Features**

- Sterile Hydrophilic PU Foam
- Low friction thin film backing
- Bacteria proof backing
- Available in regular and ‘Lite’ versions
- Soft and conformable
- High fluid retention

**Indications**

Suitable for acute and chronic exuding wounds including:

- Cuts and abrasions
- Superficial burns
- Surgical wounds
- Leg ulcers
- Pressure ulcers
- Diabetic ulcers

**Care and use symbols**

- Read instructions for use
- Single use only
- Keep dry
- Do not use if packaging is broken or damaged
- Sterilised using ethylene oxide
- Store out of direct sunlight
- Do not re-sterilize

**TOP TIP**

Advazorb® is ideal for use under compression bandaging with it’s fluid retention and low friction backing.
