# INTRODUCTION

---

The Defries Industries team share a vision of high standards and a commitment to superior patient care.

We continually strive to create outstanding products that excel in design, ease of use, effectiveness and price.

Defries has built a strong national reputation since 1980 and continues to expand and develop our product range. We are proud to be a 100% Australian family owned medical business and aim for ongoing growth and investment in Australian and New Zealand healthcare into the future.

## WE ARE COMMITTED TO IMPROVING PATIENT CARE WITH OUR QUALITY SINGLE-USE, STERILE MEDICAL PRODUCTS AND CUSTOMISED PROCEDURE PACKS

Our range of over 3000 different medical and surgical products are a combination of single sterile items and procedure packs. This catalogue features all our single sterile items and standard general packs. For customised procedure packs, please contact our Customer Service team for your local Representative's details.

## AT DEFRIES WE COLLABORATE WITH INDUSTRY LEADING SUPPLIERS

We regularly meet with our primary suppliers to explore new technologies and products available, so that we can offer our customers quality products at competitive prices. We visit our suppliers' facilities to check their Quality Management Systems and ensure the ongoing supply of components to Defries.

We are proud to distribute innovative products from Advancis Medical, DeRoyal Industries, OBP Medical, Degania Medical and NewGen Surgical. These medical companies are leaders in healthcare from around the world.

## REGULATORY COMPLIANCE IS VITALLY IMPORTANT AT DEFRIES INDUSTRIES

Our quality management system, which is based on ISO13485:2016, is regularly assessed by the TGA to ensure ongoing compliance with this ISO standard and the relevant provisions of the Therapeutic Goods (Medical Devices) Regulations 2002.

The key role of our Quality Assurance is to deliver products that are superior in safety, quality and performance by achieving ongoing compliance with approved specifications and relevant industry standards.

## SUSTAINABILITY AND ENVIRONMENTAL DECISIONS

We are committed to managing our resources actively and wisely to prevent pollution, minimise our environmental impact and reduce our carbon footprint. We regularly review how the design, manufacture and distribution of Defries products affects the environment. Our corporate sustainable strategy includes environmental values, impacts and commitments which include the following:

- Energy use and Carbon emissions
- Ethical company suppliers
- Waste management
- Water resources
- Transport and fuel emissions
- General and end user waste management

## CUSTOMISED PROCEDURE DRAPES

### THE FLEXIBILITY OF CHOICE

At Defries we have a comprehensive range of patient drapes which cover all procedures in the operating room. We provide our customers with superior products that match their clinical needs.

Our drapes are made to specific requirements such as size, fabric, fenestrations and extra details like velcro taping and clear plastic anaesthetic screens.

### CHOICE OF FABRIC IS IMPORTANT

At Defries we use a variety of drape fabrics:

Azure drapes use a viscose impervious fabric with a polyethylene laminate, suitable for general surgery with minimal fluid or short procedures. This range includes the Azure minor procedure drapes.

Sapphire drapes use a bi-laminate or tri-laminate fabric with extra reinforcement providing excellent barrier protection. This range includes back table covers, mayo covers, some procedure drapes and bespoke designed drapes to meet specific customer requirements.

Aqua drapes are our newest drape range available and use an innovative drape fabric that is a tri-laminate – a three layer drape which offers an absorbent top level, an impervious middle coating and a soft and comfortable patient layer. Soft and light, this material feels the closest to linen when draping the patient.

This high performance fabric is soft and drapable with additional features such as reinforcement around the fenestration, fluid containment pouches, positioning tape and incise area. We have an excellent standard range of designs covering all procedures from general surgery and universal packs, to orthopaedics and specialised surgery such as neuro.

Supreme drapes are made from a tri-laminate fabric and are specifically designed for high level performance whilst being soft, drapable and easy to use. These drapes provide great absorbency from fabric reinforcement around the fenestration, fluid containment pouches, positioning tape and incise area. The Supreme range includes drape sheets and specialty procedure drapes.

Our drape design includes the instructions for correct aseptic application with markings and directions on the drape to assist ease of use.

All drape fabrics are conformable to patients' shapes. They are low linting and have excellent barrier properties to prevent strikethrough of airborne and blood borne bacteria, meeting regulatory standards.

Please contact your Defries representative for further information.

## IDENTILOOPS

These radio-opaque Identiloops are used in surgical procedures for retraction, identification or occlusion of arteries, veins, nerves or tendons. A soft and flexible, inert medical grade silicone which is oval in cross-section, allows for even pressure distribution to minimise damage to tissues. Available in 4 colours – Blue, White, Red and Yellow in mini and maxi sizes. All double packed.

## NEWGEN PLANT-BASED NEEDLE COUNTERS

The outer box is made with bagasse, a post-agricultural by-product from sugarcane production, that is upcycled to create the fibre pulp. The hinges, latch, foam and magnet are similar to those found in existing needle counters and made from medical grade materials.

- Easy-to-read numbers for securing of needles
- Secure latch with audible closure
- Adhesive tabs secure the needle counter to any workspace
- Full-surface magnet provides space for larger needles and blades
- ASTM F2132 compliant for puncture resistance.

This range is currently available for inclusion in custom procedure packs only. Single sterile products coming soon.

### WOUND DRAINAGE

Wound drains and evacuators provide drainage for various surgical procedures, allowing for the removal of blood and excess fluid to improve patient outcome. Our wound drainage systems are made up of evacuators, flat drains, fluted drains, round drains, capillary action drains and easy flow drains.

They are all made from 100% Medical Grade Silicone, which is inert, soft and flexible and designed to reduce the potential of post – operative infections.

### WOUND EVACUATOR BULB

Our wound evacuator is a clear bulb with easy to read graduations up to 100ml/cc, and is designed to slowly draw fluid and blood from the wound site. It creates an ideal vacuum to a maximum of 125mmHg pressure and is compatible with our flat drains, fluted drains and round drains.

31300380DS

31300380DS	Evacuator Bulb 100ml/cc	10
------------	-------------------------	----

### WOUND FLAT DRAIN

Soft and comfortable silicone flat drains with multiple drainage holes (36 x 2) to enhance the fluid removal in a wound. They have an ergonomic flat shape which enables an easier placement. X-ray detectable.

## MEDICAL CONSUMABLES

### ANAESTHETIC FACE MASK

Our anaesthetic face masks are ergonomically designed to optimise the application of anaesthetics. The masks have an inflating air cushion that is adjustable by an inflation valve, for sealing and patient comfort.

The transparent face plate and cushion provides easy patient facial visibility. The masks are for single patient use and are provided non-sterile. We also have anaesthetic face masks with a clausson hook, if required.

# CUSTOM PROCEDURE AND STANDARD PACKS

## CUSTOM PROCEDURE PACKS

### COST EFFECTIVE AND TIME EFFICIENT: A PACK FOR EVERY PROCEDURE

Our Custom Procedure Pack range covers all areas of the hospital from Cardiac, Orthopaedic, Vascular, ENT and more. They contain all the individual consumables for a surgical procedure, wrapped in a 'field' and sterilised. All products are ready to use when opened, unlike individually wrapped consumables that are touched many times prior to use and require opening separately. Plus there is reduced wastage. Using a Procedure pack saves on setup time for procedures and ensures that all components are readily available for every case. Ordering and inventory control is easier.

### CUSTOM TAILOR A PROCEDURE PACK TO MEET YOUR SPECIFIC NEEDS

Select individual consumables such as patient drapes and surgical gowns, to diathermy, suction tubing, abdominal packs, gauze and instruments. Your pack will only include items specifically chosen by you, the surgeon and theatre nurses. Defries assembles these customised packs in cleanrooms according to hospital specifications.

Custom procedure packs can be varied to include cost-effective components as they become available, and allow easy accountability of costs per procedure. As a local Melbourne manufacturer, we are able to respond quickly to any changes requested by a hospital to the configuration of your custom packs.

Designing and implementing Defries custom procedure packs is an easy process:

We'll provide you with ongoing education, listen to feedback and are always available to discuss your specific needs.

### READY-FOR-USE STANDARD PROCEDURE PACKS

We have a range of standard procedure packs such as the anaesthetic packs, epidural packs, regional trays, catheter packs, Bronny IV insertion pack, lumbar puncture packs, ICU packs including central line packs, arterial line packs, all designed, made and ready to be ordered.

HOLLOWWARE FOR CUSTOM PACKS

### NEWGEN PLANT-BASED HOLLOWWARE

Made from 100% plant-based composite, this range offers an alternative to plastic bowls used in the operating theatre.

- Designed to hold fluids and medical supplies
- Easy to see graduations of ml and oz
- Coated with biocompatible film
- Easy to hold and stable to use
- Latex free

This range is currently available for inclusion in custom procedure packs or non-sterile. A single sterile option will be available soon.

# INSTRUMENTS AND INSTRUMENT SETS

Our single use sterile instruments will equip you with quality tools for your surgical and medical procedures. The technical design of each instrument is modelled on reusable instruments, whilst providing you the benefit of no repeat sterilisation and a reduced risk of cross infection.

Each instrument has a green dipped handle to visually identify it as single use.

Medical grade stainless steel instruments are made with an exacting mechanical finish.

They can be recycled into meltdown metal or incinerated to become non-toxic file ash.

### SUCTION DEVICE WITH LED LIGHT

#### ONETRAC LXS

ONETRAC LXS is a single-use suction device with an integrated, cordless radial LED light source. This ready-to-use device eliminates the time and expense of reprocessing and reduces the risk of cross-contamination by making reusable devices and fibre-optic light cables obsolete.

Illumination and aspiration in the depths of a surgical pocket can be met within seconds – no assembly, additional parts/components, or fibre-optic cables required.

# MEDICAL LABELS

Please contact Customer Service on 1300 550 278 to discuss your label requirements. Our durable pre-printed Sterile and Non Sterile labels are used throughout the hospital in different wards such as the Emergency Department, General Wards, Sterilising Dept, Operating Theatre and Intensive Care.

Our labels are designed to clearly and easily identify items in a hospital on a professional, easy to read label.

### PIGGY BACK LABEL ROLL

36mm x 105mm labels on a blank cylinder enabling health services to print off their own labels. 3200 labels on the roll.

LAB3612-ROLL

A healthcare worker, likely a nurse or doctor, is shown from the chest up, wearing full personal protective equipment (PPE). She is wearing a blue surgical cap, a light blue surgical mask covering her nose and mouth, and a blue surgical gown. She is looking directly at the camera with a slight smile. The background is a blurred clinical setting with white walls and a door.

## SPEyes EYEWEAR NON STERILE

Our popular DeRoyal SPEyes eyewear is designed to minimise exposure to pathogens from waste fluid. They combine innovation, quality, value, and comfort for clinicians where personal protective equipment is a vital part of self-care.

- Latex free

- Wrap-around disposable lens for complete protection
- UltraClear™ technology prevents glare, fog, and static
- Frame fits completely against forehead for splash protection from above
- Sealed lens mounting for added fluid protection
- Clip-On/Off design for quick and easy changing
- Coloured top strip allows finger-print-free handling

# SURGICAL GOWNS

CODE	DESCRIPTION	BOX QTY.	CODE	DESCRIPTION	BOX QTY.
------	-------------	----------	------	-------------	----------

## SURGICAL GOWNS

Our single-use surgical gowns have specifically been developed for the Australian and New Zealand environment. Our range encompasses gowns for short and dry procedures through to high fluid and lengthy procedures.

### OUR COMFORT RANGE – OUR SOFTEST AND MOST COMFORTABLE GOWNS

- Comfort Surgical Gown – Level 2.
- Comfort Unreinforced with Glove Assist – Level 3 gown with a reinforced sleeve to allow extra strength during gloving, but still cool, soft and ideal for short and dry procedures.
- Comfort Plus Fabric Reinforced Surgical Gown – Level 3 gown includes fluid resistant fabric reinforced panels yet remains lightweight and durable.
- Comfort Plus Poly Reinforced Surgical Gown – Level 3 gown which includes poly reinforced impervious panels for added protection.
- Comfort Zoned Protection – Fully impervious zoned panel on front and sleeves. Made from high tech BVB (breathable viral barrier) fabric, but still soft, comfortable and cool which meets AAMI Level 4 fabric standards.

### OUR CLASSIC RANGE:

- Classic Standard Surgical Gown – suitable for most surgical procedures.
- Classic Plus Reinforced Surgical Gown – Includes a reinforced panel on the front and sleeves, for surgical cases requiring extra protection.
- Coolmax Surgical Gown – breathable and cool, these gowns are notable for their superb comfort and being fully impervious. With AAMI Level 4 fabric.

Designed in close co-operation with hospital staff, our Surgical Gowns are cool and breathable with an easy fit, while offering excellent protection against strikethrough from microbial and liquid penetration.

# HAEMOSTATIC BANDAGES

First aid and haemostatic products developed in Japan to simplify haemostasis treatment. These adhesive bandages protect and secure punctured skin after an IV injection or catheter removal. Used for various situations such as covering a punctured site following an injection, to stop the flow of blood from an intravenous line using pressure immobilisation, and to treat bleeding of a peripheral vein.

## IV PRESSURE PAD

These IV Pressure pads are suitable to use following the removal of an IV, after giving an intravenous injection or after drawing blood or immunisation injections. Comprises of a 36mm round adhesive with a 16mm haemostatic pad.

The 3mm thick round pad is made of highly absorbent non-woven cellulose and creates a compression effect, resulting in bleeding stopping quickly. After bleeding has stopped, remove the pressure pad slowly and carefully.

DEF929	IV Pressure Pad 36mm White	100
--------	----------------------------	-----

DEF929

DEF924	IV Pressure Pad 36mm Tan with Mild Adhesive	80
--------	---	----

DEF924

## CHUSHAVAN – FIRST AID ADHESIVE BANDAGE

These adhesive bandages are ideal as a protective covering after an injection. They are 27mm x 27mm adhesive size with a pad size of 13mm x 13mm with 1mm thickness.

DEF1250	Chushavan Pressure Pad Medium, Packet of 8	Box of 60 packets
---------	--	-------------------

DEF1250

## STEPTY HAEMOSTATIC BANDAGE

These pressure pads comprise of a rectangular 4 way stretch adhesive with a thick compression haemostatic pad. Designed as a protective covering of peripheral veins after blood sampling, a blood transfusion or an infusion.

Two products available with different pad thicknesses.
