PLANT-BASED NEEDLE COUNTERS

The outer box is made with bagasse, a post-agricultural by-product from sugarcane production, that is upcycled to create the fibre pulp. The hinges, latch, foam and magnet are similar to those found in existing needle counters and made from medical grade materials.

- Easy-to-read numbers for securing of needles
- Secure latch with audible closure
- Adhesive tabs secure the needle counter to any workspace
- Full-surface magnet provides space for larger needles and blades
- ASTM F2132 compliant for puncture resistance.

This range is currently available for inclusion in custom procedure packs only. Single sterile products coming soon.

SURGICAL RETRACTOR

ONETRAC

ONETRAC is a single-use cordless surgical retractor with a built-in LED light source and smoke evacuation channel. It provides illumination in the depths of a surgical tissue pocket or cavity. No additional parts or components or fibre optic cables are required. Ideal for breast or reconstructive procedures, as well as other surgical procedures requiring access, illumination and retraction of soft tissue. Reduce cost, increase efficiency and eliminate unnecessary risk of cross-contamination with ONETRAC.

WOUND DRAINAGE

Wound drains and evacuators provide drainage for various surgical procedures, allowing for the removal of blood and excess fluid to improve patient outcome. Our wound drainage systems are made up of evacuators, flat drains, fluted drains, round drains, capillary action drains and easy flow drains.

They are all made from 100% medical grade silicone, which is inert, soft and flexible and designed to reduce the potential of post – operative infections.

WOUND EVACUATOR BULB

Our wound evacuator is a clear bulb with easy to read graduations up to 100ml/cc, and is designed to slowly draw fluid and blood from the wound site. It creates an ideal vacuum to a maximum of 125mmHg pressure and is compatible with our flat drains, fluted drains and round drains.

31300380DS

31300380DS	Evacuator Bulb 100ml/cc	10
------------	-------------------------	----

PERFORATED FLAT WOUND DRAIN

Soft and comfortable silicone flat drains with multiple drainage holes to enhance the fluid removal in a wound. They have an ergonomic flat shape which enables an easier placement. X-ray detectable.

11100200780DS

11100200780DS	7mm x 800mm with a 220mm Channel, White XRD Strip	10

MEDICAL CONSUMABLES

ANAESTHETIC FACE MASK

Our anaesthetic face masks are ergonomically designed to optimise the application of anaesthetics. The masks have an inflating air cushion that is adjustable by an inflation valve, for sealing and patient comfort.

The transparent face plate and cushion provides easy patient facial visibility. The masks are for single patient use and are provided non-sterile. We also have anaesthetic face masks with a clausson hook, if required.
