### C-ARM DRAPE

Large, one-piece clear poly cover for complete coverage of C-Arm with white poly adhesive strips to secure the drape in place. Packaged with a telescoping fold. Adhesive straps included to secure excess drape material.

|         |                          |    |
|---------|--------------------------|----|
| DEF5911 | 104cm x 188cm with Bands | 24 |
|---------|--------------------------|----|

### O.R. TABLE - C-ARM PROTECTOR DRAPE

Made from transparent polyethylene, this drape securely attaches to the patient drape on the operating table to help maintain a sterile field during C-Arm use. The drape is not applied to the C-Arm itself, as the imaging equipment is independently covered with the user's choice of C-Arm cover.

## CUSTOMISED PROCEDURE DRAPES

### THE FLEXIBILITY OF CHOICE

At Defries we have a comprehensive range of patient drapes which cover all procedures in the operating room. We provide our customers with superior products that match their clinical needs.

Our drapes are made to specific requirements such as size, fabric, fenestrations and extra details like velcro taping and clear plastic anaesthetic screens.

### CHOICE OF FABRIC IS IMPORTANT

At Defries we use a variety of drape fabrics:

Azure drapes use a viscose impervious fabric with a polyethylene laminate, suitable for general surgery with minimal fluid or short procedures. This range includes the Azure minor procedure drapes.

Sapphire drapes use a bi-laminate or tri-laminate fabric with extra reinforcement providing excellent barrier protection. This range includes back table covers, mayo covers, some procedure drapes and bespoke designed drapes to meet specific customer requirements.

Aqua drapes are our newest drape range available and use an innovative drape fabric that is a tri-laminate – a three layer drape which offers an absorbent top level, an impervious middle coating and a soft and comfortable patient layer. Soft and light, this material feels the closest to linen when draping the patient.

This high performance fabric is soft and drapeable with additional features such as reinforcement around the fenestration, fluid containment pouches, positioning tape and incise area. We have an excellent standard range of designs covering all procedures from general surgery and universal packs, to orthopaedics and specialised surgery such as neuro.

Supreme drapes are made from a tri-laminate fabric and are specifically designed for high level performance whilst being soft, drapeable and easy to use. These drapes provide great absorbency from fabric reinforcement around the fenestration, fluid containment pouches, positioning tape and incise area. The Supreme range includes drape sheets and specialty procedure drapes.

Our drape design includes the instructions for correct aseptic application with markings and directions on the drape to assist ease of use.

All drape fabrics are conformable to patients' shapes. They are low linting and have excellent barrier properties to prevent strike through of airborne and blood borne bacteria, meeting regulatory standards.

Please contact your Defries representative for further information.
